# MARGARITA VINEYARD

## DIVERSITY = COMPLEXITY

### THE 5 SOILS OF MARGARITA VINEYARD

Santa Margarita Ranch is also marked by an unusual diversity of soils, due largely to an array of **active fault lines** along the coastal ridge. The churning of the faults has resulted in **five distinct soil types** that ebb and flow across Margarita Vineyard.

ANCIENT SEA BED	ROCKY ALLUVIUM	SHALE	VOLCANIC	GRANITIC

### AVA ATTRIBUTES

The Santa Margarita Ranch AVA is situated along the foot of the coastal Santa Lucia Mountain Range, roughly 25 miles southeast of the city of Paso Robles and just 14 miles from the Pacific Ocean to the west.

Santa Margarita Ranch is **one of the coolest sub-appellations** within the Paso Robles AVA. The **maritime influence** increases to the west towards the Pacific Ocean and below specific topographic gaps in the range, making it "very much a true, **cool Region II climate**."
